

NIMSA VITHANAARACHCHI

Business Information Systems Undergraduate

About Me

A motivated and detail-oriented Business Information Systems undergraduate at the University of Sri Jayewardenepura with strong analytical, research, and problem-solving skills. Enthusiastic about leveraging data-driven insights and technical knowledge to support business process improvements. Experienced in Python programming, statistical analysis, and web development through academic projects. Committed to contributing to dynamic teams and gaining practical industry experience in a business analyst role.

- 5A passes including Mathematics, ICT, and English and 4B passes

Professional Certifications

• Introduction to IoT and Digital Transformation

Cisco Networking Academy

February 2026

• Cybersecurity Fundamentals

APNIC Academy

January 2026

• Project Management Foundations: Requirements

LinkedIn Learning

October 2025

• What is Generative AI?

LinkedIn Learning

September 2025

• Learning Data Analytics-1 Foundations

LinkedIn Learning

August 2025

Extra-Curricular Activities

• Member Development Officer - ISACA Student Group for the years 25/26

University Of Sri Jayewardenepura

Led the first-ever initiative to expand ISACA Student Group membership across multiple faculties of the university. Organized physical and virtual awareness sessions, represented the student group at the AGM hosted by ICBT Campus, and built professional networks with students and representatives from other universities.

• Finance Crew Member - ISACA Student Group

University Of Sri Jayewardenepura

Contributed to planning and organizing fundraising activities that supported student group initiatives and events. Worked closely with team members to coordinate event logistics while developing teamwork, communication, and organizational skills.

• Member of School Senior Committee | Secretariat of Commerce Society

Girls' High School Kandy

Actively participated in organizing school and Commerce Society activities while collaborating with students and staff to achieve common goals. Developed leadership, teamwork, communication, and organizational skills through involvement in various school initiatives.

Skills

Hard Skills

- Data Analysis
- Digital Marketing
- Python
- C#
- HTML
- JavaScript
- PHP
- MySQL

Soft Skills

- Communication
- Leadership
- Teamwork
- Organization
- Critical Thinking
- Creativity
- Adaptability

Projects

MEDFLEX AI-Assisted Reflex Blood Test Prediction System

Developed a web-based system using HTML, Tailwind CSS, JavaScript, and MySQL to predict abnormal on-demand blood test needs from routine markers. The system helps lab staff preemptively order tests, reducing patient wait times and costs. Applied skills in web development, database management, and AI integration for healthcare process improvement.

SolveMate - Solvent Filter & Catalog Browser

Served as the Business Analyst for SolveMate, a polymer-solvent compatibility management system developed using Hansen Solubility Parameters. Responsible for gathering and documenting requirements, facilitating communication between stakeholders and the development team, and maintaining the project Kanban board to track tasks, progress, and project deliverables. Contributed to project planning, requirement analysis, and ensuring the team remained aligned with project objectives throughout the development lifecycle.

CareerPulse – Centralized Job Application & Career Tracker(Mini UI/UX project)

Designed and prototyped a user-centered UI/UX solution to help young adults manage job applications, CV versions, interview schedules, and application deadlines in one platform. Conducted user interviews and applied the Design Thinking process to identify pain points related to job tracking and career organization. Developed intuitive interfaces and workflows that improve application management, reduce missed opportunities, and create a more organized job-seeking experience.

Statistical Analysis Program Development

Developed a Python program to solve key statistical equations including measures of central tendency, variability, and probability distributions. Enabled efficient and accurate data analysis for students and researchers. Applied Python programming, statistical concepts, and teamwork to deliver a practical analytical tool.
